Why InfoReady?

Before InfoReady the very first time I launched our summer fellowships, it was just basically an email out. Then I used started to use Google Forms and Sheets but it was tenuous, labor intensive and involved a ton of emails.

Now InfoReady just does all the work that I used to do for me. It's such a huge difference.

How does InfoReady help?

We spend a lot of money by the end of the fiscal year doing various competitions in InfoReady. We use InfoReady for the creative things where it's not just set tuition or set stipend.

For example, the end of the fiscal year is coming, we have $500,000 left to spend. What do we want to do? So, we open up competitions for conference funding and travel. We can blast out using InfoReady to say all students, "hey, anybody presenting at a conference, upload your abstract and the invitation to present in this application, and we can provide some money."

We have a lot of Fulbright students on campus. The Fulbright program is run through the U. S. Department of State, and they often want a cost share with the university. Yet we had no way of knowing who these students are. How much did we pay for them last year? Are they still here? What are we doing? So, we set up a Fulbright application in InfoReady. When a faculty member who admits a Fulbright student, they fill out an InfoReady application for a cost share. Now we know who the student is, who's the faculty member, what program they are in, how much money do we owe them every year. Using InfoReady for the Fulbright has also been very helpful. It's totally changed the way we cope with that, too.

I'm telling you, nobody paid me to do this, so I'm just telling you the truth about how much I love InfoReady. And the students and the faculty loved the system and the way it worked. Rather than emails back and forth, it was an official, nice way to interact with the system.
